INDUSTRIAL XTREME STRAPS

INDUSTRIAL NEW GENERATION TIE DOWN STRAPS

PART NUMBER(S):

EE0120-BK
20" BLACK

EE0121-FYW
20" FLUORESCENT YELLOW

EE0122-FGR
20" FLUORESCENT GREEN

EE0125-BK
25" BLACK

EE0126-FOR
25" FLUORESCENT ORANGE

EE0127-FGR
25" FLUORESCENT GREEN

EE0130-BK
30" BLACK

EE0131-FBL
30" FLUORESCENT BLUE

EE0136-BK
36" BLACK

EE0137-FGR
36" FLUORESCENT GREEN

Industrial Xtreme Straps are built for anyone that needs a sturdier strap or secures loads on a daily basis. Industrial Xtreme Straps are made from a stretchy, high performance polymer that has been injected with a 10-year UV additive for extra longevity. A polished, heat-treated aircraft aluminum buckle is over-molded in the manufacturing process for bombproof strength. These industrial strength straps are wide and thick, which results in a very tough and strong tie down. We recommend our Industrial Xtreme Straps for people that are constantly securing items like ladders, PVC pipes, rebar, conduit or a couple 2 x 4's to the lumber rack. Industrial Xtreme Straps are UV resistant and perform superior in cold temperatures.

WHO: Building engineers, electricians, carpenters, public works departments, hospitality, apartments, military, automotive, power plants, schools, government facilities, aerospace, construction and maintenance, plumbers, HVAC technicians

WHERE: Anywhere tying down or strong hold is needed

WHAT: Ladders, PVC pipes, rebar, conduit, wood panels, equipment, extension cords, splints, wires

FEATURES AND BENEFITS:

- Made from high performance polymer
- UV, freeze and chemical resistant
- High work load limit of 70 lbs

DIRECTIONS: Make sure logo on the strap is facing outward. Thread the tip of a strap through the buckle. Stretch and secure over flange. Tension will hold gear like a vice.
